User's Manual

Edition: JAN 2013

Version 1.00

Federal Communications Commission (FCC)

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Declaration of Conformity

These devices comply with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. These devices may not cause harmful interference.
2. These devices must accept any interference received, including interference that may cause undesired operation.

Lithium Battery Replacement

To avoid possible danger of explosion, ensure correct polarity when changing the lithium battery. Replace only with the same or equivalent type recommended by the manufacturer.

WEEE (Waste from Electrical and Electronic Equipment)

The WEEE wheeled bin symbol on the product or on its packaging indicates that the product must not be disposed of with other waste. It should be the user's responsibility to dispose of their waste equipment by handing it over to an approved location for the recycling of waste electrical and electronic equipment. For more information about where to send your waste equipment for recycling, please contact your local city office, your household waste disposal service or where you purchased the product.

Important Safety Instructions

Failure to observe these safety instructions may cause bodily injury, or damage to the product. Read these instructions carefully and keep this user's manual in an accessible location for future reference.

The product may cause a fire or electric shock when it is used improperly. Observe the above safety measures at all times.

If the product is damaged, immediately turn off the power and disconnect the power cord. Contact your dealer for assistance.

1. Do not plug in or unplug the power cord with wet hands.
 2. Do not plug the product into an AC outlet with the incorrect voltage.
(Be sure to use a voltage that is between AC 100V~240V)
 3. Do not plug several products into one multi-outlet.
 4. Do not apply pressure to the power cord or place heavy objects on it.
 5. Immediately stop using the product if it emits strange noise, odor, or smoke.
 6. Do not use aerosol sprayers containing flammable gas inside or around the product.
 7. Do not allow foreign objects or liquids to enter the product, or serious damage may result.
 8. Do not place the product on an unstable surface. The product may cause a fire if it is dropped, damaged, or broken.
-

The following instructions will help you to make better use of this product.

1. Keep the machine away from locations subject to high humidity, dust, or temperatures that exceed the specification.
2. Clean the product only by using a dry cloth or a cloth soaked with detergent. Never use thinner or other volatile solvents for cleaning.
3. At the end of the day, clean and inspect the exterior of the machine after the machine is powered off.
4. Use only specified accessories.
5. Do not expose the accessories directly to sunlight, high temperatures, humidity, dust, or gas.
6. Do not place heavy objects on top of the product or lean them against the product. These items may fall down and cause injury.

Do not block the air vent of the product as this can cause heat accumulation inside the box machine and may cause a fire.

INTRODUCTION

Welcome

Thank you for choosing the CPD-3230 Customer Pole Display. The CPD-3230 is a 20 columns x 2 lines customer display with Vacuum Fluorescent Display panel. VFD emits a very bright light with high contrast. Based on VFD display method, the CPD-3230 gives a better view of message in bright blue-green display fonts.

1.1 Unpacking

Confirm that all the following items are contained in the carton. If any item is missing or damaged, contact the dealer from whom you purchased the product.

■ CPD-3230 Customer Pole Display Set:

1.2 Features

1. Vacuum Fluorescent Display
2. Eye-catching bright blue-green display font
3. Unique panel design to vitalize your retail interior.
4. Supports 14 language characters, including those from the USA, France, Germany, UK, Sweden, Denmark I and II, Italy, Spain, Norway, Greek, Slavonic, Russian and Portuguese.
5. Provides 6 command modes: EPSON ESC/POS, ADM787/788, UTC/S, UTC/P, EMAX (AEDEX), CD5220 and DSP-800 (option).
6. The wide-range of power supplies input to prevent misuse.
7. Low power consumption achieves optimal energy use and reliability.
8. Innovative hinge design for quick panel adjustment.
9. User-programmable for all fonts and customer messages.
10. Hardware Interface:
 - Standard
 - Full speed data transfer using the USB 2.0 protocol.
 - RS-232C Interface with baud rates selectable from 9600 to 115200 bps.
11. Mechanical:
 - Provides a wide range of rotation and tilt angles.
 - Selectable pole length for best position installation.

1.3 Specification

Model	CPD-3230
Display Method	Vacuum fluorescent Display text mode display panel
Number of Characters	40 characters (20 columns x 2 lines)
Display Color	Blue-green
Brightness	700 cd/m2
Font	I. 96 alphanumeric characters II. 14 sets of international characters: USA, France, Germany, UK, Sweden, Denmark I and II, Italy, Spain, Norway, Greek, Slavonic, Russian and Portuguese III. One set of user downloadable characters
Character Size	5x7 Dot Matrix 9.03 mm x 5.25 mm
Command Set	1. EPSON ESC/POS 2. ADM787/788 (option) 3. EMAX (AEDEX) 4. UTC/S, UTC/P 5. CD5220 6. DSP-800 (option)
Interface	■ RS-232C 9600/19200/38400/115200 bps ■ USB 2.0
Option	■ Pass-through: (1) RS232C (2) USB Hub ■ Power adapter
Power Supply	Power input via USB 5V
Power Consumption	3~5W
MTBF	25,000 hrs
Certification	CE/FCC Class A
Rotation Angle	Vertically: 0-36 degrees Horizontal: 0-270 degrees
Physical Dimension	
Head (W x D x H)	215 x 57 x 92 mm
Support (H x Ø)	Long: 250 x 34 mm; Short: 117 x 34 mm
Base (W x D x H)	200 x 120 x 27 mm
Weight	N.W. 1.0 kg
Environment	
Operation Temperature	5~45°C
Storage Temperature	-20~70°C
Operation Humidity	15%~80% RH
Storage Humidity	10%~90% RH

CHAPTER 2 INTERFACE

2.1 Communication Specification

■ RS232C Type

Data transmission	Serial
Synchronization	Asynchronous
Handshaking	None
Signal level	MARK = -3 to -15V (logical "1" OFF) SPACE = +3 to +15V (logical "0" ON)
Baud rate	9600, 19200, 38400, 115200 bps
Parity	None, Even
Bit length (Data word length)	8 bits
Stop bits	1 bit

■ USB Type

The CPD-3230 series is compatible to the High-speed USB 2.0 protocol which has a raw data rate of 12 megabits per second (Mbps).

2.2 Standard Interface

2.2.1 Serial RS232 connector to PC/HOST

Connector Type: D-sub 9Pin (Female)

INSTALLATION

The CPD-3230 Customer Pole Display is easy to install by following the instructions in this chapter. No special training or tools are necessary. As this manual contains required information on the installation and programming of CPD-3230 Customer Pole Display, it is recommended that you read the entire manual carefully prior to initiating installations.

3.1 Physical Function

3.1.1 Display Dimension

3.1.2 Assembling

Insert the RJ45 end of the dual interface cable through the base and the pipe then into the panel and connect to the RJ45 slot. You can extend the pole to the desired height by attaching the extension pole for different heights:

Low 173 (mm), Mid 260 (mm), High 394 (mm) and Highest 482 (mm).

NOTE: Attach the joint of the extension pole or stand base to the Display Panel until it is properly locked.

3.1.3 Rotation

This product allows a 270 degree rotation in either horizontal direction.

ATTENTION

- (1) Violently rotating the Display Panel may cause damages of the Display Panel.
- (2) Secure the Display Panel properly after attaching the extension pole to a desired height.

3.1.4 Angling

This product allows 0~36 degree tilt angle adjustment. The Display Panel can be easily tilted to the desired position by using a hinge design.

How to Adjust

- (1) Locate the hinge section on the backside of Display Panel.
- (2) Pull the tab downward and tilt the panel up or down to the desired position.

3.2 Configuration

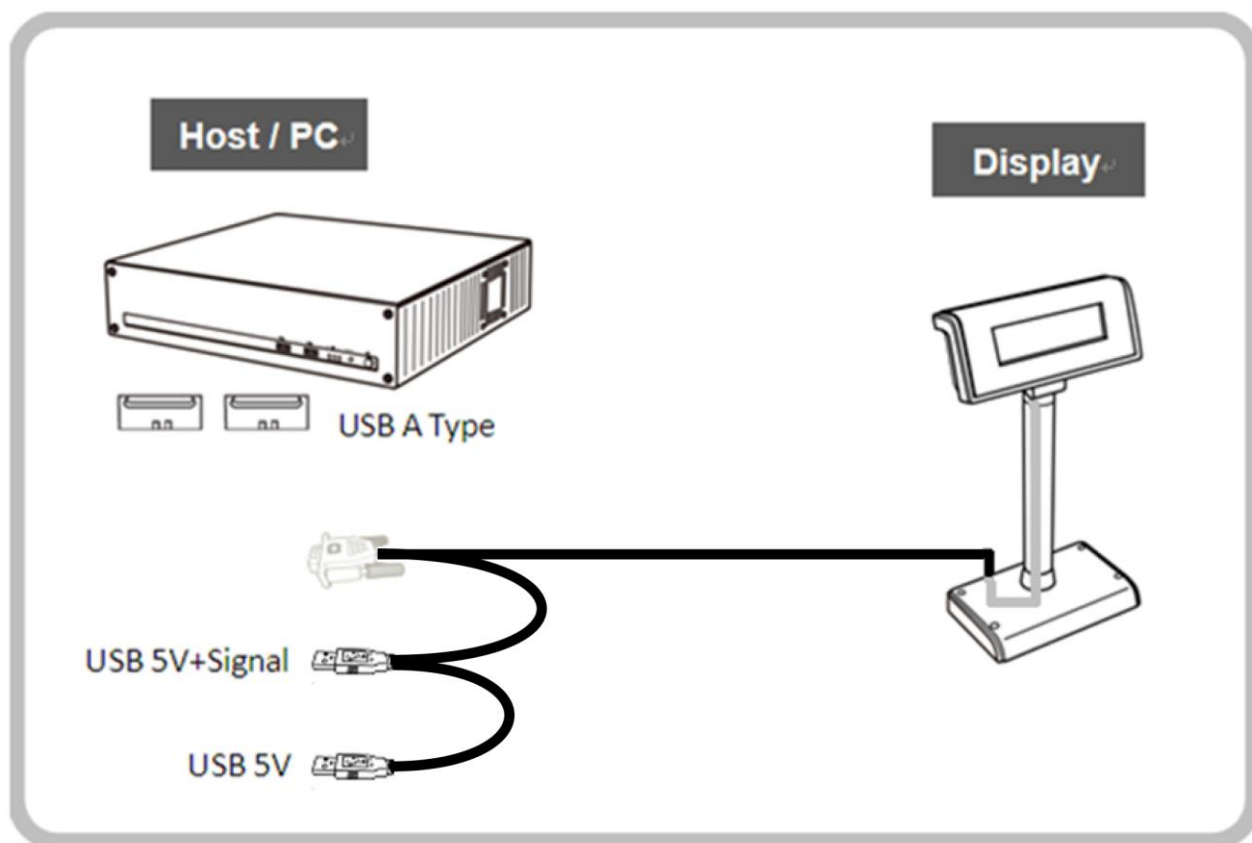

3.2.1 USB Connection

Step 1 Turn OFF the system power

Before you start the installation, ensure that the host computer and the CPD-3230 Customer Pole Display are powered off.

Step 2 Connect the USB cable

Step 3 Start the host PC and switch on the display.

3.2.2 RS232 Connection

Step 1 Turn OFF the system power

Before you start the installation, ensure that the host computer and the CPD-3230 Customer Pole Display are powered off.

Step 2 Connect the RS232 cable

Plug the DB9 Female connector of RS232 cable and **only** the 5V USB cable to host PC. Now you are ready for power-up.

Step 3 Start the host PC and switch on the display.

ATTENTION

With the dual interface cable, the CPD-3230 is able to be powered only by the USB 5V.

3.3 Driver Installation

The firmware for the USB port is divided into CDC class (Virtual COM) and printer class. To recognize which firmware version it is, check the starting status of your customer display as Pic 1:

Pic 1

The version affix F or H : CDC Class.

The version affix E or G : Printer Class.

In case your USB port is in CDC class and your application software is connected by USB port, you must install the driver:

Pic 2

-Click CDC Class as Pic 2.

-check the device manager to find the COM port number as below.

Pic 3

If your Application Software needs to install the printer mode driver:

Click Printer Class as Pic 2 and select as shown in the Pic 3,4:

-Serial/Virtual for COM Connection.

-USB for USB Connection.

Pic 4

CHAPTER 4

CONFIGURE YOUR DEVICE

The system parameters of CPD-3230 can be set by using VFD Utility software tool. You can find the tool in the companion disk. In addition to setting system parameters, you can configure welcome message and user font with the software tool. The system parameters include the following items.

- Language Character Set
- Command Type
- Baud rate
- Parity Check

4.1 Before starting

Before starting the software, please make sure the CPD-3230 is connected to your PC and it works. If you use USB interface or device driver, please install device driver before starting the software. If the connection is OK, execute the software.

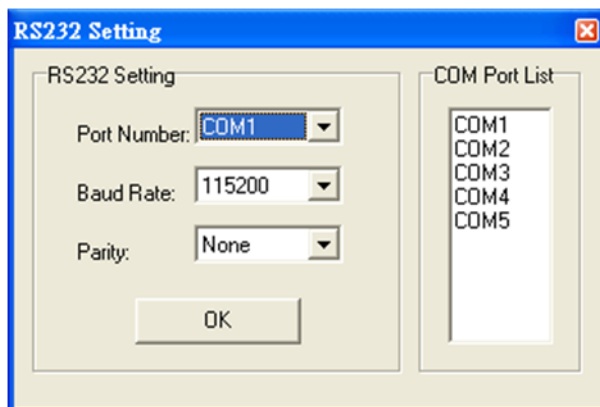

4.1.1 Select a proper interface

After starting the software, the following dialog will pop up. Select a proper interface.

4.1.2 RS-232 Interface

If you select the item COM port (RS232 only), the dialog of RS-232 setting will show up the guide you configure the RS-232 interface. Please make sure the parameters that you type here are the same as the settings of your host PC. If the parameters aren't the same, the communication between host PC and your machine will fail.

4.1.3 Selecting Device Driver

Please select your device from the pull-down list on following dialog. If the device driver is installed, your device shall be shown on the list.

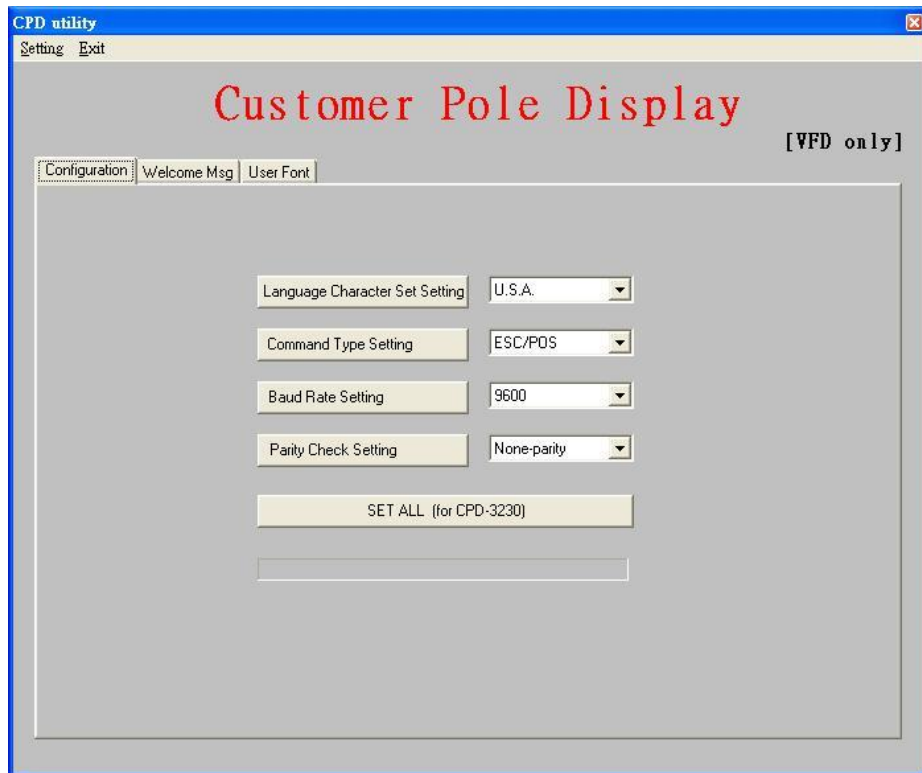

4.1.4 Select Model Name

Before continue, please select a proper model name that matches with your device's model. The model name can be selected on the upper-right corner of the window. If the model name does not match with your device, the configuration may not take effect.

4.2 Configure System Parameters

There are three pages on the main dialog. The first one is the Configuration Page. You can select desired character type, command set and baud rate of RS-232 interface. After all items are set to desired condition, press SET button to send all the settings to your device. These settings will be stored on the non-volatile memory. Every time when you start the device, these settings will be retrieved from non-volatile memory.

4.2.1 Command Type

The CPD-3230 supports up to 7 command sets. They are listed on the following table. Please select one from the pull-down list.

Command Type	Default
EPSON ESC/POS	*
DSP-800(option)	
ADM787/788	
EMAX(AEDEX)	
UTC/S	
UTC/P	
CD5220	
Reserved	

4.2.2 Language Character Set Selection

The CPD-3230 supports the following language character set. Please refer to following table for character code page.

Character Set(20h-7Fh)	Code Table (80H-FFH)	Default
U.S.A	PC-437 (USA, Standard Europe)	*
France	PC-858

4.2.3 Baud Rate Selection

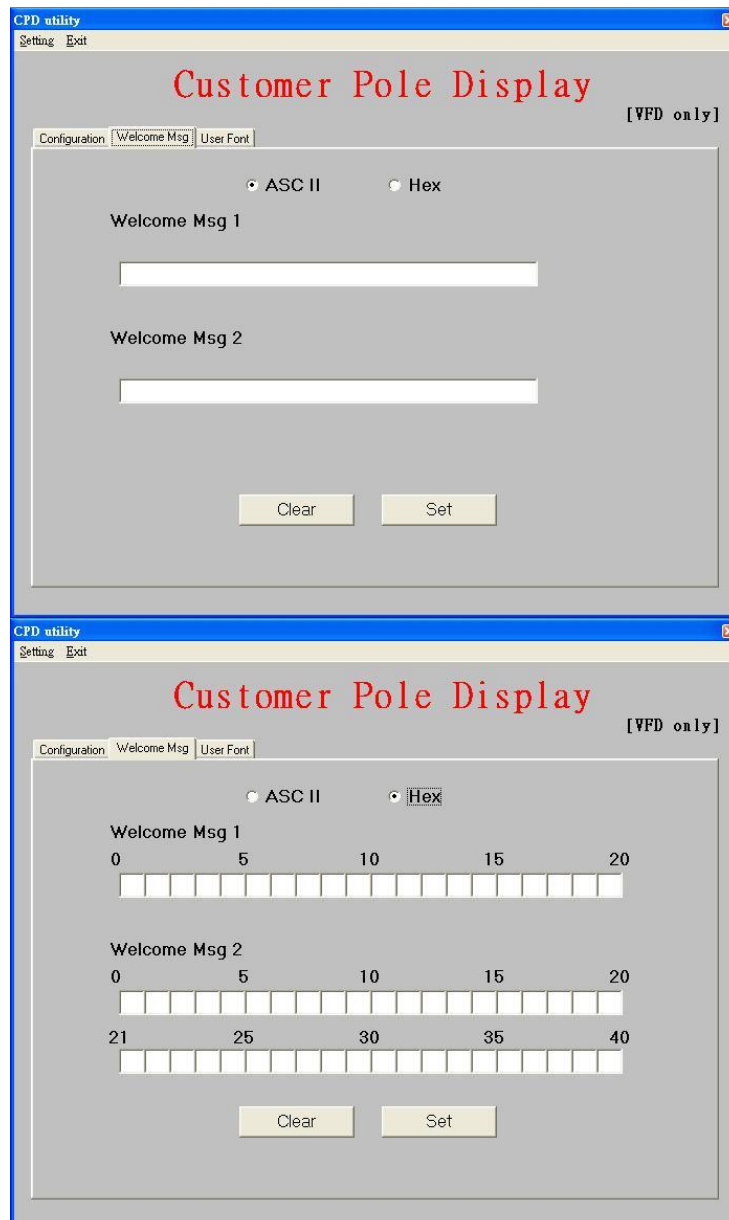

Baud Rate (bps)	Default
9600	*
19200	
38400	
115200	

4.2.4 Parity Check Selection

Parity Check	Default
None-parity	*
Even-parity	

4.3 Define Welcome Message

You can define your own message in the display. The Msg1 is displayed steadily on upper line while the Msg2 is displayed on lower line in marquee status. You can type the character on keyboard in ASCII mode or type others in Hex mode. Press Set button to send the messages to the machine.

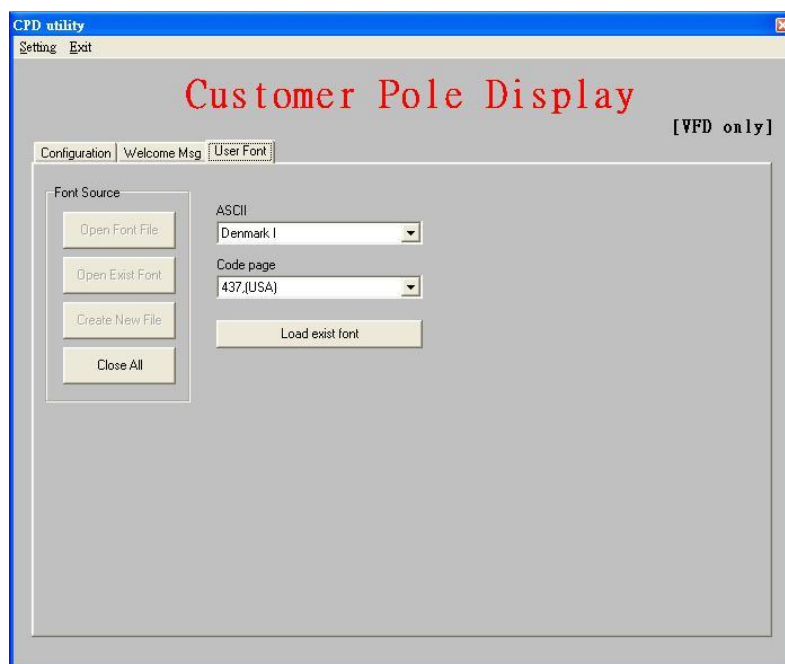

4.4 Define Your Own Font

You can create your own font and download it with the software tool. There are three ways to create the font:

4.4.1 From an Existing Font

You can see the following dialog by pressing "Open Exist Font" button.

Please select a font to be your font base and modify it to fit your requirement.

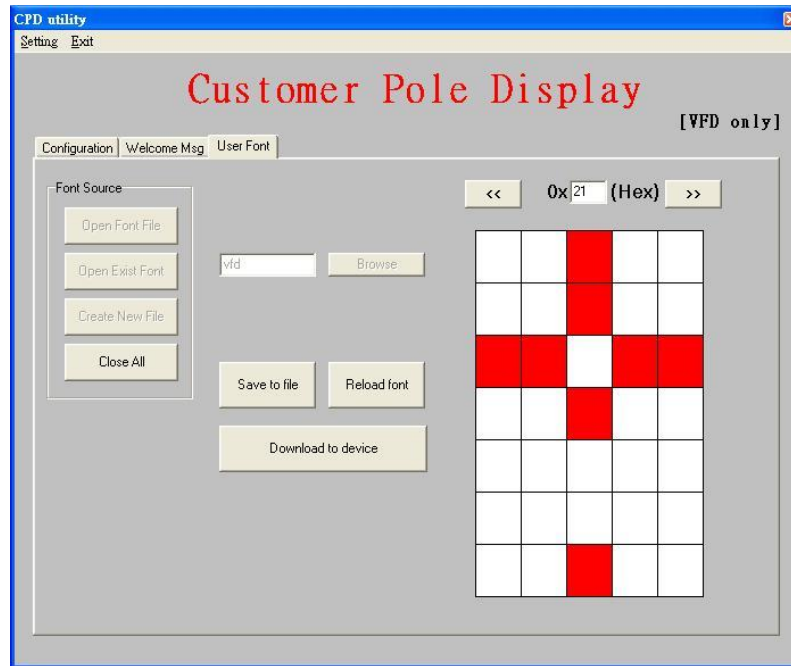

1, The first part is ASCII code which contains the characters coded as 0x20~0x7f. Within the ASCII, some of characters own different definition in different country. Please refer to the user's manual for the details of the code table.

2, The second part is 0x80~0xff which is the range that code page refer to. You can select a desired code page from the list as a base of your font.

After selecting these existing font, press "Load Existing Font" and the font will be loaded into system memory. Once you finish editing font, you can choose either to save your font to a file by pressing "Save to file" or download your font to device by pressing "Download to device". If you want to quit current modification, you can press "Reload font" button to load the font again. All your modification will be lost after reloading font. Press "Reset" button also let you abandon current modification and restart the whole operation.

4.4.2 From Your Font File

You can modify previously edited and saved font file. Press "Open Font File" button the following dialog will be shown. After select a file, the font contained in that file will be loaded into memory. Then, you can edit font, save font to a file or download the font to device.

4.4.3 From your scratch

If you want to build your font from scratch, press "Create New File" button to create an empty font. After finishing your edit, you can save font to a file or download the font to device. It is a difficult job to build font from zero. It is recommended to build your font from existing font.

CHAPTER 5

SOFTWARE SETTING COMMAND

User can re-set the default configuration by using the following software commands:
